4. Comments:

- 4.1) Please identify what you perceive to be the real strengths and weaknesses of this instructor and course.
- Professor Lim is a nice professor who seems to care about his students and the subject. He is, however, really disorganized and inattentive with homework, exams, and the class overall. Professor Lim seldom returns emails, can move too quickly through lectures, and often makes mistakes on exams and homework that negatively effect students' performances. He is a great communicator and speaker but I feel that he needs to take more time and put forth additional effort toward the class. He makes a lot of mistakes on assignments, etc. and sort of waits to the last minute to let us know, and then brushes it off like it isn't a big deal. Although I have managed to do relatively well in his class, his disorganization and frequent mistakes puts more stress on the student, and makes his class very frustrating at times.
 - Professor Lim was a great professor! I definitely learned more than I expected and understood the material more than I would have because his lectures were structured well which made it easier for me to understand. Also, he was awesome with OH- I could hardly make it to his scheduled OH because of class conflicts but always made himself available to meet with me after my class which was EXTREMELY helpful considering I was worried about my grade/homework/tests every day! He was also very approachable and I felt he really cared about my understanding the material or not! Overall, awesome class- I learned a lot thanks to Professor Lim!
 - This professor is brilliant- he knows what he is talking about and can really break down the dense, difficult concepts to the point where I could better understand. Of course I will not become an expert like Professor Lim, but I feel that I have gained at least an introductory grasp of what is involved in data analysis. There were times where I had difficulty which were reflected in poor performance on a homework assignment and quiz, but I feel very proud of myself for the progress that I have made. My confidence level in this subject initially was frighteningly low, but as I attended office hours and listened to lectures my confidence level increased significantly. This of course would not have been possible without Professor Lim. I cannot name a weakness with either the instructor or the course. It really comes down to how much time I was able to invest outside of class time and office hours in order to truly understand the subject. Working part-time at a law firm as a paralegal, being a wife and mother, impacted how much I could get out of the course as far as time is concerned, but I enjoyed every minute in which my complete focus was on this subject.
